## Report of the Superintendent

---

### *To the School Board of New Castle:*

I herewith submit my third annual report as Superintendent of your schools.

From three years' association with the school board and townspeople of New Castle I know well that the people expect and demand modern and efficient schools. I know, too, that the people wish their children to be taught not only reading, writing and arithmetic, but that they place a high value on character training and the social relationship which mean a successful life after school days are over. The relationship between pupil and teacher in your schools is remarkable. Mutual respect—each for the other—is evident during each moment of the schoolday. The relationship between parents and the schools is one of unusual harmony. Under such conditions there need be no apprehension as to the success of our work. Although in material conditions of our building there are things which should be improved the two essentials of a successful school are there—good teachers and willing pupils.

Once again the percentage of attendance is very high being recorded as 97.28. Your school kept the maximum of 180 days with but 23 tardinesses.

The new method of reading, mentioned in my previous report, has been efficiently taught by Miss Trefethen this year. It is a method requiring much preparation on the part of the teacher and I wish to express my appreciation for the time and effort Miss Trefethen has put into the work. By this method children come into contact with larger units and larger ideas before meeting single words. In this way they are taught to read ideas rather than calling each word singly. I am sure we shall realize a great improvement in the reading of our pupils because of this change.

This year New Castle has a school nurse for the first time. She has been interested in the health of our children. She has made many home visits to aid parents in the health problems of our children. She has been able to secure that co-operation which produces results for the good of our pupils and of our schools. Important as is this health work in normal times, in times of financial stress when rigid economy is necessary in many families, it is vitally important.

New Castle is not now eligible for state-aid for schools. If a new law should be passed by this legislature, now sitting, lowering the amount necessary to appropriate locally, it would be well to apply for such aid. The Brookings Institute report has recommended such a step.

It is interesting to note that the ranks earned by New Castle pupils in Portsmouth Junior High School parallel very closely those that the same pupils obtained while in New Castle. This seems to show that the standards of New Castle and of Portsmouth are practically identical and that the grading and ranking by the teachers of our school is authentic and accurate. I believe the preparation of our pupils for the Portsmouth Schools is adequate, and while I cannot of course speak for the Portsmouth officials I have reason to know that they believe this also.

One real way to gain help for the teachers is by furnishing opportunity for several groups to get together, compare notes and explain means by which each has secured the best results in her own work. That this may be done, occasional meetings of the teachers of the Union are being held. At these meetings teachers who have had particular success in a special activity explain their methods and procedure to the group. Thus the best of each teacher's ideas becomes the property of all the teachers in the Union. By a joining together of these successes the level of all teachers is raised. I believe these meetings have the interest of the teachers and react to the benefit of our pupils.

It is always a pleasure to visit your schools and to become, for a time, a part of a happy contented group. As a board you have been ever helpful to me in my work. I wish once again to thank you for this help.

Respectfully submitted,

ROY W. GILLMORE,

*Superintendent of Schools.*
